Subject: RE: CERCLA Offsite Rule Determination

Categories: EZ Record - Shared

Hello Mr. Lyle - The **Energy Fuels Uranium Mill** (formerly the White Mesa Uranium Mill) located near Blanding, Utah continues to be acceptable. Here's the verification of continued acceptability (VCA):

The OSR acceptability status is dynamic in nature and subject to change, Region 8 has instituted a policy where EPA conducts a verification of continued acceptability (VCA) on facilities that have been previously found acceptable under the CERCLA Off-site Rule (OSR) such as the **Energy Fuels Uranium Mill** in Utah. The purpose of a VCA is to provide a periodic check to assure that the facility continues to be acceptable. VCAs are conducted when a request for OSR status is received and the previous VCA had been conducted more than 60 days prior. VCA are valid for 60-days.

A VCA was completed for the Energy Fuels Uranium Mill on December 12, 2013, so the VCA is valid until **February 12, 2014**. CERCLA waste shipments sent to the Energy Fuels Uranium Mill up until February 12th, are in full compliance with the OSR. If CERCLA wastes are planned to be sent after this date, please submit a request for a new VCA about a week or so prior to February 12th, so that a new VCA can be conducted at that time. Thanks.

Terry J. Brown
 Regional OSR Coordinator
 US EPA Region 8

Subject: CERCLA Offsite Rule Determination

Good Morning Mr. Brown:

As we discussed this morning Dawn Mining Company of Ford, WA is looking for a CERCLA off-site rule determination for its Midnite Mine water treatment plant sludge. We are looking for a CERCLA off-site rule determination for the Energy Fuels - White Mesa Uranium Mill located near Blanding, Utah. We would expect to begin shipping sludge the first of April 2014.

Thank you for your assistance,
 William Lyle
 General Manager/Vice President
 Dawn Mining Company, LLC
